

Activity#4 Customer Feedback:

The customers were satisfied with the current price since no payment is required at the moment. However, they may incur additional costs if they decide to upgrade their plug-ins to meet their needs.

Even though our customers didn't mention their preferred colour or photos, we assured them that they could easily modify their preferences in the future since the website is easy to maintain.

A customer asked about the meaning of themes in WordPress. We will ensure to choose the appropriate words while delivering the presentation since the audience may have a different background or interests than us.
