	Colleen	**Charlene**
Home	Diversity in pictures should be considered Choose one navigation design in order to have similarity Stick with green, grey, darker green for the main site theme	Appealing photo colour become a member tab prominently Easy to navigate to membership page Middle paragraph is excellent
About us		Captures content from current site History and first meeting not significant Unclear about the meaning of Future plans
Membership Page	Improvement to registration form for membership registration	Detailed and informative Well-laid out Members portal fits well Certification and event tabs need further development
Certification		Not sure if it will be used
Event	Add a current events and previous events Add an event sign up form	Potential for improvement Not well-developed currently
Blog	"Blog"->"Media"	Layout and inclusion of archives and webinars are impressive
Resource		
Overall	Watch our punctuation Logo consideration (gray, black, green)	Font size: Small and difficult to read in some cases

	Feedback from Colleague	
	Works well coming to home page. can reach easily to blog. Can discover Membership subpage easily. It is the button right at front to go to membership page. Works well as intended; navigating to each page. Easily can access through sub menu of events. Very well done. Footers are solid and easily accessible.	I can experience both discoverability and understandability. It was east to move between the pages and find what I was looking for. Everything seemed to be working with me. The only one part which made me stop and think; finding the home page, then I found out that I have to click on the logo to go to the home page. I suggest adding a home button to make it easier for user, but other than that it is great
	Everything working well but the blog page a little difficult to reach out Better to use the carousels of images some places. Sticking to just one type of design for every page Overall a good customer experience	Clear transition to home page. I really like your blog page and easy to read It has way to much text, working,
